

SAFDAR AYUB

AI-Assisted Full Stack Developer | SaaS Prototype Engineer | Vibe Coder

safdarayub@gmail.com | +92-332-961-1639 | Pakistan | safdarayub-dev.vercel.app | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI-assisted Full Stack Developer and Vibe Coder with hands-on experience shipping production-grade SaaS applications using **Claude Code (Opus)**, **Vercel V0**, and **Cursor** as primary development accelerators. Built a full-stack **CRM and campaign management platform** from scratch — contacts CRUD, visual audience segmentation rule builder, multi-step campaign wizard, and analytics dashboards — deployed live in days, not months. Proficient in **Next.js 16**, **TypeScript**, **Tailwind CSS**, **ShadCN UI**, **Prisma**, **REST APIs**, and third-party integrations (Stripe, Resend, Cloudinary, Redis). Translates product briefs and wireframes directly into working prototypes within 2–3 days. Military-trained discipline in quality and delivery — 23+ years of service ensuring zero-defect standards.

TECHNICAL SKILLS

AI Dev Tools	Claude Code (Opus), Vercel V0, Cursor, OpenAI Agents SDK, MCP SDK, FastMCP, Prompt Engineering
Frontend	Next.js 16 (App Router), React.js, TypeScript, Tailwind CSS, ShadCN UI, Framer Motion, Recharts, Zustand, Remotion
Backend & APIs	Node.js, FastAPI, REST APIs, Webhooks, Zod-validated API routes, React Hook Form, Server Actions
Databases & ORM	PostgreSQL (Neon), SQLite, Turso/LibSQL, Prisma (v7 dual-adapter), SQLModel, Supabase, Qdrant Cloud, Upstash Redis
Auth & Payments	NextAuth.js v5, Clerk, Better Auth, JWT, Gmail OAuth2 — Stripe Checkout, multi-role RBAC patterns
CRM / Campaign	Contacts CRUD, audience segmentation logic, multi-step campaign wizards, KPI analytics, event-driven triggers
Integrations	Stripe, Resend (transactional email), Cloudinary, Upstash Redis, Odoo ERP (RPC), Google OAuth, WhatsApp
DevOps & Cloud	Docker, Kubernetes, Helm Charts, OCI/OKE, NGINX Ingress, Dapr, Apache Kafka, GitHub Actions, Vercel (SSG/ISR/SSR)
Languages	TypeScript, JavaScript, Python

KEY PROJECTS

Campaign Manager — Full-Stack CRM & Campaign Platform MOST RELEVANT GitHub | Live Demo

CRM dashboard with audience segmentation, campaign workflows, and analytics — shipped as working prototype in days

- Built full-stack CRM with **contacts CRUD**, **visual audience segmentation rule builder** (AND logic, multiple operators, live 300ms-debounced preview), multi-step campaign wizard, and analytics dashboard
- Implemented **server-rendered dashboard** with KPI cards and Recharts analytics — zero client-side data waterfalls; audience segmentation rule engine with live preview
- Engineered **Prisma v7 dual adapter pattern** (SQLite local / Turso LibSQL production) with Zod-validated REST API routes — production-ready API foundation engineers can scale
- Designed contact lifecycle model with audience targeting logic directly applicable to deposit optimization campaign features

Stack: Next.js 16, TypeScript, Tailwind CSS, ShadCN UI, Prisma, Turso/LibSQL, Zod, Recharts

AHF Auto Parts — Production JDM E-Commerce SaaS Platform GitHub | Live

Full-stack production SaaS with admin dashboard, CRM-style order management, and Stripe payments

- Built production-grade SaaS platform with **full admin dashboard**: order management, customer list (CRM), product/category CRUD, contact inbox, and Recharts analytics
- Implemented **Stripe Checkout** and bank transfer with 30-minute stock reservation (Upstash Redis) — preventing overselling during concurrent checkout sessions
- Architected **SSG + ISR (60s)** for storefront and **SSR** for auth-protected admin routes; Google OAuth + credentials via NextAuth.js v5; transactional email via Resend
- Delivered end-to-end in weeks using AI-augmented workflow (Claude Code) — production foundation ready for engineering team to scale

Stack: *Next.js 16, TypeScript, PostgreSQL/Neon, Prisma, NextAuth.js v5, Stripe, Cloudinary, Zustand, Upstash Redis, Resend, Vercel*

Personal AI Employee — Autonomous Agent System

HACKATHON PLATINUM

GitHub

Demonstrates AI-augmented development: Claude Code as primary build tool + 4 custom MCP servers with event-driven triggers

- Built with **Claude Code as primary development driver** — 12 custom Claude Code skills for automated task processing
- 4 custom **FastMCP servers** (email, social media, Odoo ERP, documents) with circuit breaker patterns — directly analogous to CRM webhook connectors and third-party data integrations
- Designed **event-driven triggers** and risk-based action routing (routine/sensitive/critical) — applicable to campaign automation and lifecycle trigger logic

Stack: *Python, FastMCP, Claude Code (Opus), Gmail OAuth2, Playwright, Odoo RPC, APScheduler, PM2*

Physical AI & Humanoid Robotics Interactive Textbook

GitHub | Live

- Built interactive SaaS with RAG chatbot using **OpenAI Agents SDK, FastAPI, Neon Postgres, and Qdrant Cloud**
- Implemented **user authentication** (Better Auth), role-based access, and API integrations — demonstrates multi-tenant SaaS patterns

Stack: *DocuSaurus, React, FastAPI, OpenAI Agents SDK, MCP SDK, Neon DB, Qdrant Cloud, Better Auth, Vercel*

PROFESSIONAL EXPERIENCE

Quality Control Inspector & Electronics Technician (Retired)

Feb 2000 – Mar 2023 (23 Years)

Pakistan Air Force

- Led quality control inspection across Air Logistics and engineering depots — enforcing zero-defect standards directly transferable to production SaaS delivery
- Managed cross-functional technical teams, HR development, and liaison with international personnel — mirrors Agile collaboration with Product and Engineering stakeholders
- Maintained mission-critical communication and avionics systems under strict operational SLAs — discipline applicable to 2-week ship cycles and rapid iteration

EDUCATION & CERTIFICATIONS

Certified Agentic and Robotic AI Engineer — PIAIC, Air University Islamabad *Expected 2026*

Master of Computer Science (CGPA: 3.11) — Virtual University of Pakistan *2012*

DAE Radio Technology (71%) — School of Electronics, PAF Korangi Creek *2003*

Artificial Intelligence & Computing Programme — PIAIC Presidential Initiative (2023) | PCAP: Programming Essentials in Python — Cisco / OpenEDG (2022)

Portfolio & Demos: [safdarayub-dev.vercel.app](#) | GitHub: [github.com/safdarayubpk](#) | All projects include live demos and GitHub repos — Campaign Manager directly demonstrates deposit optimization CRM workflows.
