

QATAR AIR FORCE — INTERVIEW PREPARATION GUIDE

Safdar Ayub | Assistant Warrant Officer (Retired) | RO FITT (G) — AVCS / Radio Ground
PAK No: 865942 | 23 Years PAF Service | Trade Proficiency: SUPERIOR | Medical: GC-1 (FITT)

YOUR STRONGEST SELLING POINTS — MEMORIZE THESE

All 3 Experience Levels

Flight Line + 2nd Line + QC Sqn — exact match to requirement

AWACS Ground Entry Station

No. 850 Readiness Flt — AWACS data relay to Air Command Sectors

Air Defence Radar Operations

TPS-43G at Samungli — live mission support to Air Defence Controllers

ATC Radio Communications

Kohat Radio Room — direct ATC communication support

Avionics Quality Control

PAF Faisal 107 AED — pre/post avionics inspection, 4Y 11M

SUPERIOR Trade Rating + 5 Medals

Official PAF assessment + Tamgha-E-Azm, Tamgha-E-Istaqlal

How to Use This Guide

Read each question aloud. Then cover the answer and try to say it in your own words. Practice daily for 20–30 minutes. The goal is NOT to memorize word for word — the goal is to know the key points so you can speak naturally and confidently.

PHASE 1 — Phone Screening Questions

Q1 Tell me about yourself.

"I am Safdar Ayub, retired Assistant Warrant Officer from Pakistan Air Force with **23 years of service** in the Radio Ground trade — RO FITT G. My experience covers all three operational levels — **Flight Line, 2nd Line engineering support, and Quality Control Squadron**. I worked on AWACS Ground Entry Stations, ATC radio rooms, air defence radar systems, and avionics quality control. I was rated **SUPERIOR in trade proficiency** by PAF and hold 5 service medals including Tamgha-E-Azm. I am 45 years old, medically GC-1 fit, and ready to serve."

Q2 Why do you want to join Qatar Air Force?

"Qatar Air Force operates advanced modern aircraft and systems. My experience in AVCS and radio ground systems, quality control, and military aviation standards makes me **directly applicable to QAF operations**. I want to continue contributing to military aviation in a professional environment that matches my expertise and 23 years of experience."

Q3 How many years of experience do you have?

"I have **23 years of total PAF service** from February 2000 to March 2023. Of that, **20 years were specifically in my trade** — RO FITT G — covering flight line, engineering wing, inspection, and quality control roles at multiple PAF bases including Samungli, Kohat, PAF Farid, Nur Khan, and PAF Faisal."

Q4 Why did you leave PAF?

*"I completed 23 years of full service and was **transferred to pension establishment on 21 March 2023** — which is an honourable retirement after completing full service tenure. I left with SUPERIOR trade proficiency rating and five service medals."*

Q5 Are you willing to relocate to Qatar?

*"Yes, absolutely. I am **fully prepared to relocate to Qatar**. I am committed to this opportunity and ready to serve."*

Q6 What is your medical status?

*"At the time of my retirement from PAF, my medical category was **GC-1 FITT** — which means fully medically fit. I am in good health and ready for active duty."*

PHASE 2 — Technical Questions

Q7 What is your trade and what does it involve?

"My trade is **RO FITT G — Radio Officer Fitter Ground**. It involves operation, maintenance, inspection, installation, and repair of ground-based radio communication systems, navigation aids, and avionics ground support equipment used in support of military aviation operations."

Q8 Explain your Flight Line experience.

"At **No. 850 Readiness Flight, PAF Base Farid**, I operated the Ground Entry Station supporting AWACS operations. When the Swedish AWACS aircraft took off, its radar data was downlinked to our GES. I maintained the full data relay chain — **M3SR Radios, Ground Entry Module, Cisco Catalyst Switch 3560, Digital Timing System, LMR Router, and VHF Filter** — and ensured this data was forwarded in real time to the designated Air Command and Control Sectors."

Q9 What is a Ground Entry Station (GES)?

"A Ground Entry Station is a **ground-based facility that receives downlinked data from airborne surveillance platforms like AWACS**. It processes and relays radar picture and intelligence data to air command and control sectors, allowing ground commanders to have real-time air picture from the airborne radar. I operated and maintained all communication equipment within the GES."

Q10 What is AWACS and what was your role with it?

"AWACS stands for **Airborne Warning and Control System**. It is an airborne radar platform that provides 360-degree air surveillance. In PAF we operated Swedish AWACS aircraft. My role was on the ground — at the Ground Entry Station — where I **received the downlinked radar data from the aircraft, maintained all equipment in the data link chain, and ensured continuous relay of information to Air Command Sectors**."

Q11 Describe your Quality Control experience.

"At **PAF Base Faisal, No. 107 AED Quality Control Squadron**, I performed pre and post maintenance quality control inspection of all avionics equipment. I supervised avionics technicians, evaluated defect trends, initiated corrective actions, maintained technical documentation, and liaised with flight operations on equipment serviceability. I was rated **SUPERIOR in trade proficiency** and served as technical supervisor for the QC team for nearly 5 years."

Q12 What communication systems have you worked on?

"Throughout my 23 years I worked on **VHF and UHF radio systems, M3SR tactical radios, Voice Logging Systems, PDH and SDH optic fiber systems, Defcomm digital switches and exchanges, PABX telephone exchanges including Hicomm 330H, Public Address Systems, LMR routers, VHF filters, Ground Entry Modules, and Digital Timing Systems**. I also hold CCNA certification with 92% score covering network infrastructure."

Q13 Have you worked with ATC communications?

"Yes. At **PAF Base Kohat Engineering Wing**, I served in the Radio Room providing full communication support to Air Traffic Controllers. I maintained all VHF and UHF radio systems used by ATC, Voice Logging

System, and supporting infrastructure ensuring **safe aircraft operations** at the base."

Q14 Tell me about the TPS-43G radar.

"The TPS-43G is an **American long-range air defence radar**. At PAF Base Samungli No. 400 Squadron, the radar data fed into our Radio Room. I maintained the radio communication systems in that room and provided **direct communication support to Air Defence Controllers during live operational missions** of flying squadrons, ensuring uninterrupted real-time support."

Q15 What is your 2nd Line experience?

"I have two postings of 2nd line experience. At **PAF Base Kohat Engineering Wing (4 years)**, I maintained base-wide communication infrastructure including radio systems, SDH backbone, and Defcomm digital exchange. At **PAF Base Nur Khan No. 103 ALC Inspection Section (4 years 5 months)**, I conducted comprehensive quality inspection of all types of air and ground equipment at the Air Logistics Centre, prepared defect trend reports, and coordinated rectification with technical teams."

Q16 What awards did you receive in PAF?

"I received **five awards** during my service — **Tamgha-E-Azm** (Commendation Medal), **Tamgha-E-Istaqlal** (Independence Medal), 20 Years Service Medal, 10 Years Service Medal, and Pakistan Independence Day Diamond Jubilee Medal."

Q17 Do you have NOC from PAF?

"Yes. My discharge was through the **official transfer to pension establishment process**. I can provide all required documentation including my PAF Certificate of Service Form P-14A."

PHASE 3 — Questions YOU Should Ask Them

Always ask 2–3 questions at the end. This shows professionalism and genuine interest.

"What aircraft types and communication systems does Qatar Air Force currently operate that I would be supporting?"

"What is the contract duration and what are the terms for renewal?"

"What documentation is required from Pakistani retired PAF personnel for the application process?"

"Will there be a technical assessment or medical examination before final selection?"

PHASE 4 — Documents to Keep Ready

Qatar AF Tailored CV (Safdar_Ayub_Qatar_AF_Resume.pdf)	Ready ✓
PAF Certificate of Service — Form P-14A (photos)	Ready ✓
CNIC (National Identity Card)	Ready ✓
Passport — check validity (minimum 6 months required)	Check Today !
DAE Radio Technology Certificate	Gather Now
MSc Computer Science Degree Certificate	Gather Now
CCNA Certificate	Gather Now
PAF Course Completion Certificates	Gather Now
Passport-size photographs (recent)	Prepare

PHASE 5 — Interview Do's and Don'ts

DO

- Speak slowly and clearly
- Use military terminology confidently
- Mention SUPERIOR rating naturally
- Say "Sir" when addressing an officer
- Pause and think before answering
- Be honest about your experience
- Sit straight — military posture
- Ask questions at the end

DON'T

- Rush your answers
- Over-explain or ramble
- Sound boastful or overconfident
- Use informal or casual language
- Say "I don't know" — say "I will confirm"
- Exaggerate or claim false experience
- Interrupt the interviewer
- Forget to mention your 5 medals

Daily Practice Plan

Day	Focus Area	Questions to Practice
Day 1	Introduction & Background	Q1, Q2, Q3, Q4, Q5, Q6
Day 2	AWACS & Flight Line	Q8, Q9, Q10
Day 3	QC & Technical Systems	Q11, Q12, Q13, Q14
Day 4	2nd Line & Awards	Q7, Q15, Q16, Q17
Day 5	Full Mock Interview	All questions — timed practice

Day	Focus Area	Questions to Practice
Daily	Selling Points	Read the 6 selling points every morning

Most Important Reminder

Check your passport validity today. Qatar jobs require at least 6 months validity. If it is expired or near expiry, start renewal immediately — this can take weeks and will block your hiring even if you are selected. Do not delay this.
