

SAFDAR AYUB

Aviation Technician | AVCS / Radio Ground (RO FITT G) | Quality Control Inspector

safdarayub@gmail.com | +92-332-961-1639 | Gumbat, Kohat, KPK — Pakistan | Date of Birth: 05 April 1981
(Age 45)

PAK No: **865942** | Rank: **Assistant Warrant Officer** | Trade: **RO FITT (G)** | Medical: **GC-1 (FITT)**

PROFESSIONAL SUMMARY

Retired Pakistan Air Force Aviation Technician with **23 years of distinguished service** (Feb 2000 – Mar 2023) in the AVCS / Radio Ground trade (RO FITT G). Extensive hands-on experience across all three operational levels — **Flight Line** (Ground Entry Station), **2nd Line** (Engineering Wing & Air Logistics Inspection), and **Quality Control Squadron** — covering VHF/UHF radio systems, avionics navigation aids, digital communication systems, and military-grade ground support equipment. Rated **SUPERIOR** in Trade Proficiency by PAF. Medically fit (GC-1). Officially recommended by commanding officers as a technical expert in radio/navigation aid systems, quality control inspector, and technical supervisor. Ready to deploy expertise in support of Qatar Air Force operations.

CORE COMPETENCIES

✦ VHF / UHF Radio Systems	✦ Flight Line Operations	✦ Quality Control Inspection
✦ Navigation Aid / Radio Maintenance	✦ 2nd Line Engineering Support	✦ Avionics Equipment QC
✦ Digital Communication Systems	✦ Control Sqn Technical Supervision	✦ AWACS Data Link & GES Operations
✦ ATC Radio Communication Support	✦ Air Defence Radar (TPS-43G) Interface	✦ PDH/SDH Optic Fiber Systems
✦ Defcomm / PABX Systems	✦ Military Leadership & Supervision	✦ Pre/Post Maintenance Inspection
✦ Defect Trend Analysis	✦ CISCO Network Infrastructure (92%)	

PROFESSIONAL EXPERIENCE

Quality Control Technical Supervisor & Avionics Inspector

Dec 2017 – Nov 2022

PAF Base Faisal — No. 107 AED, Quality Control Squadron

4 Years 11 Months

CONTROL SQN AVIONICS QC

- Performed pre-maintenance and post-maintenance quality control inspection of all avionics equipment to military-grade standards
- Provided technical supervision over avionics technicians ensuring serviceability and airworthiness compliance
- Evaluated defect trends and initiated corrective actions to maintain operational readiness of avionic systems
- Maintained inspection records and technical documentation in accordance with PAF engineering orders
- Liaised with flight operations and engineering units on avionics equipment serviceability status

Quality Inspector — Air & Ground Equipment

Aug 2013 – Dec 2017

PAF Base Nur Khan — No. 103 ALC, Inspection Section

4 Years 5 Months

2ND LINE INSPECTION / QC

- Conducted comprehensive quality inspection of all types of air and ground equipment at Air Logistics Centre
- Assessed serviceability of communication and avionic systems against technical specifications and PAF standards
- Prepared inspection reports and defect trend analysis to support engineering decision-making

- Coordinated with technical teams to ensure timely rectification of faults and compliance with maintenance schedules

Radio Technician — AWACS Ground Entry Station (Flight Line)

May 2010 – Aug 2013

No. 850 Readiness Flight, PAF Base Farid

3 Years 3 Months

FLIGHT LINE

AWACS GROUND ENTRY STATION

- Operated Ground Entry Station (GES) receiving and processing real-time radar data downlinked from AWACS (Airborne Warning and Control System) Swedish aircraft and forwarding intelligence to designated Air Command and Control Sectors
- Maintained M3SR Radios, LMR Router, VHF Filter, and Digital Timing System ensuring continuous and uninterrupted AWACS data link communications
- Managed Cisco Catalyst Switch 3560 and Ground Entry Module forming the digital backbone of the AWACS data relay infrastructure
- Ensured 24/7 serviceability of all GES systems critical to national air defence surveillance and command sector operations

Equipment: M3SR Radios, Cisco Catalyst Switch 3560, Ground Entry Module, Digital Timing System, LMR Router, VHF Filter

Radio Technician — Engineering Wing & ATC Radio Room

Jun 2006 – May 2010

PAF Base Kohat — Engineering Wing

4 Years

2ND LINE

ATC COMMUNICATIONS

ENGINEERING SUPPORT

- Served in the Radio Room providing full communication support to Air Traffic Controllers (ATC) for safe aircraft operations at PAF Base Kohat
- Maintained and repaired VHF/UHF radio systems, Voice Logging System, and all ATC communication infrastructure
- Operated Public Address System and PABX telephone exchange supporting base-wide communications
- Managed SDH backbone and Defcomm OXE digital communication exchange serving the entire base engineering wing

Equipment: VHF/UHF Radios, Voice Logging System, VHF PAE 4004, Hicomm 330H PABX, SDH, Omni PCX M2 (Defcomm OXE Exchange), Public Address System

Radio Technician — Radar Radio Room & Air Defence Communications

Apr 2003 – Jun 2006

PAF Base Samungli — No. 400 Squadron

3 Years 1 Month

OPERATIONAL UNIT

AIR DEFENCE RADAR

- Operated Radio Room receiving data feeds from TPS-43G American air defence radar and routing processed information to air defence command and control network
- Provided dedicated communication support to Air Defence Controllers during live operational missions of flying squadrons
- Maintained VHF/UHF radio systems, Voice Recorders, and FM 200 communications ensuring uninterrupted support to operational flying missions
- Ensured continuous serviceability of all radio room assets critical to real-time air defence operations

Equipment: TPS-43G Radar Interface, VHF/UHF Radios, Voice Recorders, Walkie Talkies, FM 200

Technical Staff — Directorate of Network Communication

Nov 2022 – Mar 2023

Air Headquarters Islamabad — Dte of NWC

4 Months

HQ STAFF

- Managed NGN (Next Generation Network) operations and staff duties at Air Headquarters level
- Supported budgetary management, forecasting, and resource allocation for network communication directorate

Official PAF Citation: "Proficient radio trade technician/supervisor with vast experience in operation, maintenance, inspection and installation of radio equipment. Technical expert for repair & maintenance of navigation aid/radio systems.

PROFESSIONAL COURSES — PAKISTAN AIR FORCE

#	Course / Training	Period	Result
1	CISCO Certified Network Associate (CCNA)	Jun 2022 – Jul 2022	Pass — 92%
2	FMX Operation, Maintenance & Administration	May 2022 – Jun 2022	Pass
3	Military Leadership & Command (JCO)	Oct 2020	Pass — 66.17%
4	CSEP Management	Mar 2020	Pass — 80.65%
5	Electromedical "D" Level Maintenance	Jul 2019 – Aug 2019	Pass — 74%
6	Quality Control Familiarization	Aug 2019	Pass — 67.20%
7	Maintenance Supervisory Course	Dec 2016 – Jan 2017	Pass — 72.75%
8	Defcomm Switches "O" Level	Mar 2016 – Apr 2016	Pass — 80%
9	Defcomm Power Management	Feb 2016	Pass — 55%
10	Digital Radio System OA&M	Aug 2009	Pass — 54%
11	PDH / SDH Optic Fiber System Maintenance	Aug 2006 – Sep 2006	Pass — 72.80%
12	Balloon Barrage System Course	Jan 2001	Pass — 64%

AWARDS & MEDALS

- ★ Tamgha-E-Azm (Commendation Medal)
- ★ Tamgha-E-Istaqlal (Independence Medal)
- ★ 20 Years Service Medal
- ★ 10 Years Service Medal
- ★ Pakistan Independence Day Diamond Jubilee Medal

EDUCATION & QUALIFICATIONS

Master of Computer Science (CGPA: 3.11)
Virtual University of Pakistan
2012

DAE — Radio Technology (71%)
School of Electronics, PAF Korangi Creek
2003

F.Sc (Pre-Engineering)
Pakistan
PAF Qualifications: Qualifying Examination-I & II,
Maintenance Supervisory Course

SERVICE RECORD SUMMARY

Service Number	PAK / 865942	Trade	RO FITT (G) — Avionics/Radio Ground
Enrolled	11 February 2000	Released	21 March 2023
Trade in Service	09 Jun 2003 – 21 Mar 2023	Domicile	KPK — Pakistan
Reason for Release	Transfer to Pension Establishment (Honourable Retirement)		

POST-RETIREMENT PROFESSIONAL DEVELOPMENT

Following honourable retirement from PAF, continuously pursuing advanced technical education. Currently enrolled in **Certified Agentic & Robotic AI Engineer programme** at PIAIC, Air University Islamabad (2023–2026). Developing expertise in AI systems, full-stack development, and cloud technologies — demonstrating continued commitment to learning modern digital and networked systems directly applicable to aviation communication infrastructure.
